▪ Systems for all, all for systems ▪

# Academic Management Information System

## OVERVIEW

It was developed with the aim of facilitating the administration of educational activities, all of which are managed online through this system. Among the many administrative activities, there are new student admissions, the preparation of educational schedules, the keeping of student records, the recording of lecturer data, attendance, employees, students, and filling in grades as some examples.

## Technical Specifications

- Online admissions, inquiries
- Online exam
