SEIROCOMMANDO

Integrated Monitoring System

Overview

Module for Tables and Reports

- In essence, it is a platform for combining different types of reports into one monitoring center platform in a flexible manner
- Integrated into a database that can be analyzed and other processes can be carried out in the future

Module for Chart Integration

- It is a way to integrate various information and data dashboards into a single platform that can be used for decision making purposes
- Integrated into a database that can be analyzed and other processes can be carried out in the future

Module for Data Modelling

Used to carry out the process of analysis and modeling of the data before it is displayed on a dashboard as a result of that analysis and modeling. In addition to pivoting, drill-downs (detailing), drill-ups (summarizing) and other appropriate models, this process involves pivoting and drill downs (detailing).

Module on Statistics & Trend Analysis

An analysis tool that is used to process statistical analysis of existing data, including trend analysis, standard deviation analysis, etc.
