INVENTUR RFID

**Book Inventory
management System
(RFID-Based)**

OVERVIEW

It is important for librarians to manage books in the library and to manage their inventory in a fast and efficient manner with Book Inventory Management Suites.

In addition to keeping track of the number of items you have in your library, they provide a suite of software solutions that provides complete control over your inventory and helps you make better library management decisions.

Technical Specification

- Reading RFID books is a process that is capable of being carried out by the reader
- Incorporating RFID data acquisition into a business process
- It is possible to save data to the device's local database
- A mobile device based on the Android operating system
- Upon completion of the inventory process, the data will be consolidated with the database
- The RFID system in the library is integrated with other RFID systems in the library
