

KULANIX

Guest Book Management Information System

Features

Autocheck-in

It is time for you to streamline your building's check-in process with Kulanix Guestbook Management Information System. Kulanix Guestbook Management Information System is the practical automated front desk system for modern building management systems. In order to make your guests feel welcome, the auto check-in feature will speed up the registration process for them and make them feel at home without having to hire more staff members.

Touchless Secure Check-In

By using their mobile device, visitors are able to provide all the information needed to complete the check-in process. A faster, more efficient, and safe way for receptionists to handle reception, especially during a pandemic, is to do away with logbooks, touchscreens, and unnecessary contact with staff members.

Features

- It is possible to read the RFID tags of visitors
- Using the keyboard or the screen keyboard to enter data
- The data has been saved to the database server
- The Library will provide feedback in the form of announcements/messages
- A RFID-enabled building is used to introduce visitors and greet them
- The RFID system has been integrated with other RFID systems in the library as well
